I. INTRODUCTION

"Among the most misunderstood aspects of law and order are property rights."

-Thomas Sowell

"One can learn a great deal of jurisprudence from the works of literature . . . ."

-Richard A. Posner

For the last several decades, legal scholars have used works of literature to gain a fuller understanding of the nature and purpose of law.

† J.D. and Candidate, Texas A&M University School of Law Spring 2015, M.A., Denver Seminary, 2013, M.A.T., Georgia College & State University, 2006, B.S., Georgia College & State University, 2005.

The author would like to thank the following people for their support: Sarah Benton, John & Diane Benton, Doug Groothuis, Rick Maes, and Ryan Kearns.

This field of study is known as Law and Literature. Proponents of this new discipline of legal scholarship endeavor to use literature as a unique lens through which legal issues can be studied, understood, and applied. However, some Law and Literature detractors either question the legitimacy of this new academic project outright, or at least require more convincing. Indeed, even among Law and Literature supporters, there is a wide spectrum of opinions regarding the nature and purpose of Law and Literature.

This Article offers J.R.R. Tolkien’s classic stories, *The Hobbit* and *The Lord of the Rings Trilogy*, as useful for Law and Literature scholarship because they have a large audience of all ages, who have either read them in books or seen them as movies. Their widespread popularity makes these stories an effective way to introduce and inspire many to the property law jurisprudence that permeates the texts. While Tolkien’s literature has not been traditionally utilized for Law and Literature purposes, there are several issues of property law jurisprudence that can be elucidated through Tolkien’s writings.

This Article begins by briefly assessing the debate regarding the efficacy of Law and Literature, proposes Tolkien’s literature as a legitimate means of stimulating an interest in property law jurisprudence, and concludes by exploring a variety of property law issues using Tolkien’s literature as the background material facts.

II. LAW AND LITERATURE: A BRIEF OVERVIEW

A. Introduction to Law and Literature

Law and Literature is an academic pursuit built on the premise that “literature can teach lawyers, judges, and legal scholars basic things about how the law does operate, and how it should . . . .” While the roots of Law and Literature can be traced decades earlier, there was an explosion of Law and Literature legal scholarship in the 1980s, and that trend has continued. This is not to say all legal scholars have signed on to Law and Literature without trepidation. Indeed, many in the legal academy have wrestled with the legitimacy of this sub-discipline and the role it should play in legal scholarship, if any.

6. See *infra* note 15.
8. See *White, supra* note 3; see also *Bix, supra* note 7 (“Benjamin Cardozo . . . wrote an article [in 1925] on the literary styles of judicial opinions . . . .”).
scholars are ambivalent about the efficacy of Law and Literature.\textsuperscript{10} Still other scholars have embraced Law and Literature with enthusiasm, recognizing that literature may help us understand depths of the law not yet understood.\textsuperscript{11}

Perhaps the high-water mark for the Law and Literature debate came in the United States Supreme Court’s opinion of \textit{Plaut v. Spendthrift Farm, Inc.} in which Justices Antonin Scalia and Stephen Breyer clashed over how to best appropriate the Robert Frost poem, “Mending Wall.”\textsuperscript{12} Justice Scalia referenced “Mending Wall” to support the proposition that in a government with separated powers, “Good fences make good neighbors.”\textsuperscript{13} Justice Breyer disagreed with Scalia’s application of the poem, and responded, “One might consider as well [Frost’s] caution, for he not only notes that ‘something there is that doesn’t love a wall,’ but also writes, ‘Before I built a wall I’d ask to know / What I was walling in or walling out.’”\textsuperscript{14} While opinions regarding who had correctly applied Frost varied, this Supreme Court opinion provided a tacit legitimacy to Law and Literature in a way it did not previously enjoy. Nevertheless, in the wider context of legal scholarship, Law and Literature is still a relatively new discipline with a diversity of opinions regarding the nature and purpose of Law and Literature.\textsuperscript{15}

\section*{B. Theories of Law and Literature}

Law and Literature has typically been appropriated in two ways: law-\texti{as}-literature, and law-\texti{in}-literature.\textsuperscript{16} Law-as-literature frames the practice of law essentially as “the mastery of texts, whether of cases, statutes, or the Constitution.”\textsuperscript{17} \textit{Pace} legal positivism, the practice of law is necessarily an endeavor to interpret and contextualize language, as “the ordinary language of all developed legal systems includes constant recourse to texts that authorize specific conduct.”\textsuperscript{18} This view that law-as-literature is helpful in the interpretation of language is un-
derscored by many Supreme Court decisions,\textsuperscript{19} as well as the canons of construction that aid statutory interpretation.\textsuperscript{20} While there is a significant disagreement with respect to how one ought to interpret statutory language,\textsuperscript{21} there is little debate that this view of law-as-literature is a legitimate one. As Gary Minda notes, “The law-as-literature perspective has been quite popular in legal studies throughout the 1980s mainly because it has served to show how literary activity is an integral part of the central activity of law—i.e., the interpretation of legal texts (case opinions, statutes, and regulations).”\textsuperscript{22}

While law-as-literature is generally considered useful, the law-in-literature perspective received more of a mixed response. Law-in-literature has typically “attempted to show how the stories in the classics of Western literature might offer lawyers and judges important lessons about the nature of law lessons which are missing in the official reported stories of the cases.”\textsuperscript{23} While this early incarnation of law-in-literature was well-received, its recent manifestations have been more controversial. Perhaps co-opted as part of the wider postmodernist project that dominated English departments for the latter half of the twentieth century, the classical literature of “Dickens, Kafka and Melville [was] being edged-out by authors like Derrida, Foucault, Heidegger and Wittgenstein as Law and Literature scholars explored the meaning of law’s language as a cultural and literary artifact.”\textsuperscript{24} Thus, law in literature began a shift “beyond the Great books of Western literature to the critical texts of literary theory, structuralism, post-structuralism, deconstructionism and the like to aid them in their literary translations of legal texts.”\textsuperscript{25} This shift blurred the lines between law-as-literature and law-in-literature, and stigmatized Law and Literature as a meaningless academic exercise, as devoid of meaning as the very texts that the postmodern literary critics purported to deconstruct.\textsuperscript{26} Indeed, the postmodern literary agenda is so entrenched in Law and Literature that there is currently a movement afoot to go even “beyond law and literature in the traditional sense to a new literary study of language as cultural discourse.”\textsuperscript{27} Before going down this path, law-in-literature proponents would be wise to remember the late Christopher Hitchens observation that “[t]he

Postmodernists’ tyranny wears people down by boredom and semi-literate prose.”

C. Supporters and Detractors

The increased interest in Law and Literature has touched off a spirited scholarly debate regarding the efficacy of this new academic project. The debate has become more pointed with the development of the law-as-literature and law-in-literature perspectives. Several preeminent legal scholars have staked out positions on each side of the debate, thus ensuring a conclusion settled by an adversarial system. Professor Richard A. Posner seems to occupy the role of leading critic of Law and Literature, while a variety of other scholars offer a robust defense of this burgeoning discipline.

The prolific judge and legal scholar Richard Posner has devoted an entire book to the topic of Law and Literature. Now in its third edition, Posner’s assessment of Law and Literature pulls no punches: “I shall argue that only rarely can we learn much about the day-to-day operations of a legal system from works of imaginative literature even when they depict trials or other legal processes.” Statements such as this cause many to consider Posner a staunch critic of Law and Literature. However, Posner himself contends that “if the first edition of this book had rather a negative and even defensive character . . . that was more than 20 years ago and the negative tone was gone by the second edition.” Indeed, it seems that Posner’s antipathy toward Law and Literature may be more properly understood as criticism of particular developments within Law and Literature, rather than opposition to the movement in principle. For example, Posner cites as problematic Law and Literature’s incorporation of postmodern literary theory “that is making laughingstocks of English departments . . . ” While Posner’s concern with respect to the problems of postmodern literary theory is apt, it is worth noting that the Critical Legal Studies (“CLS”) school has already adopted much of the postmodern’s disdain for metanarratives and belief that all truth is

35. Id. at 10.
merely a social construct. That is to say, if postmodernism in legal scholarship is Posner’s problem, Law and Literature is hardly the only category of legal scholarship under its influence. Nevertheless, Posner’s stance appears to have shifted from outspoken critic to a more sympathetic position.

Many scholars disagree with Posner’s bleak (or formerly bleak) assessment of Law and Literature. Law and Literature professors at the University of Tennessee College of Law, Jerry J. Phillips and Judy M. Cornett confidently state that “there are many reasons to teach Law and Literature . . . .” Indeed, Phillips and Cornett are so convinced of the importance of Law and Literature that they co-authored a textbook to demonstrate and “support [the] many ways of teaching Law and Literature.” Professor Bruce L. Rockwood waxes poetic in his optimistic perspective on Law and Literature: “Law and literature are like flint and steel over the kindling of our doubts and uncertainties in a rapidly changing modern, or postmodern, world. By knocking the flint of literature against the steel of the law, we can make some sparks that will illuminate our way to the future . . . .” Professor Hilde Hein believes that the interdisciplinary approach of Law and Literature is not only useful, but perhaps necessary given the limitations of both law students and the study of law: “Approaching law through art enlivens the law even as it permits exploration of law’s gaps and exclusions.” Therefore, Hein concludes, “I believe that insight into one area will also help us to understand the other.” Finally, Gary Minda is optimistic that for Law and Literature, the best is yet to come: “This is where we are today; Law and Literature at century’s end is just coming to acknowledge the full meaning and significance of what it means to translate the meaning of a text.”

Despite these disagreements over the nature, purpose, and efficacy of Law and Literature, there is broad agreement that Law and Literature is useful for jurisprudence. While jurisprudence has undergone its own historical transformation, modern jurisprudence is “the study of the general and fundamental elements of a particular legal system, as opposed to its practical and concrete details.” Thus, even Posner himself concedes, “[O]ne can learn a great deal of jurisprudence from

38. Id.
41. Id. at 114.
42. Minda supra note 9, at 256 (emphasis added).
the works of literature . . . ."44 John Fisher also supports the legitimacy of Law and Literature with respect to jurisprudence when he states, “The Law and Literature movement is . . . fundamentally a form of jurisprudence.”45 Richard Weisberg further acknowledges, “Law and Literature actually began as a subcategory of jurisprudence.”46 Therefore, as there is broad agreement regarding the efficacy of Law and Literature with respect to jurisprudence, this Article will use Tolkien’s works to specifically explore aspects of property law jurisprudence.

D. The Literary Canon, Tolkien, and the Public Consciousness

As previously alluded to, there is significant debate within Law and Literature regarding which literary texts should be used for Law and Literature.47 Different legal scholars use a variety of criteria in determining the utility of studying a particular work of literature. However, several works are granted near universal legitimacy such as Charles Dickens’ *Bleak House*,48 Franz Kafka’s *The Trial*,49 and Fyodor Dostoevsky’s *Crime and Punishment*.50 Indeed, this is not surprising as each of these works and their authors are traditionally within the Great Books literary canon and the pantheon of great authors. However, as discussed above, some proponents of Law and Literature explicitly reject the “Great Books” within the Western tradition—Shakespeare, Dickens, Melville, etc.—specifically because they view Law and Literature as part of the larger deconstructivist project, characterized by postmodernism and the Critical Studies approach.51 Richard Weisberg views this approach as misguided: “I do not think the case has been made for Law and Literature’s abandoning the canon . . . .”52 In support of the Great Books approach, perhaps in light of the logical deficiencies of postmodernism, Weisberg notes, “There is a reason why, these days, lawyers are furthering the return to the Great Books.”53

While the question of Tolkien’s place in the Great Books discussion is an interesting one, the debate is superfluous to this Article. The

53. Id.
utility of a particular work of fiction in using Law and Literature to learn jurisprudence is unrelated to whether or not Tolkien is in the literary canon (although it seems clear that Tolkien’s literature has made the cut). Of far greater importance is the widespread societal pervasiveness and enjoyment of the literary work. That is, it matters more for the purposes of this Article that many people read and enjoy Tolkien, rather than whether Tolkien’s work is canonical or useful for a postmodern agenda.

John Ronald Reuel Tolkien was a twentieth century English writer and philologist, who is best known for his fantasy epics, The Hobbit and The Lord of the Rings. Tolkien chaired the Department of English Language and Literature at Oxford University, and his professional activities included a position as Assistant Lexicographer for the New Oxford English Dictionary. Despite his publisher’s low expectations for The Lord of the Rings, Tolkien’s literature has been generally lauded since The Hobbit was first published in 1937. Indeed, several polls in 1999 rated The Lord of the Rings Trilogy as the greatest book of the twentieth century. Moreover, Tolkien has been described as “the most influential author of the [twentieth] century.”

Time Magazine named The Lord of the Rings Trilogy third on its list of the best novels from 1923–2005. The box office success and critical acclaim of the film adaptation of The Lord of the Rings Trilogy and the current film adaptation of The Hobbit into respective three-part films, have further cemented Tolkien’s stories into the public consciousness.

54. See, e.g., Richard Lacayo, ALL-TIME 100 Novels, TIME MAGAZINE (Jan. 6, 2010), http://www.time.com/time/2005/100books/the_complete_list.html.

56. Id.

57. See, e.g., Colin Duriez, THE J.R.R. TOLKIEN HANDBOOK 11 (1992) (“[H]is publishers were convinced that The Lord of the Rings might well make a financial loss for them.”).

60. Lacayo, supra note 54.

63. Indeed, the films and their licensed progeny have been so successful that Tolkien’s estate has filed two separate lawsuits to seek compensation; see, e.g., Claudia Eller & Rachel Abramowitz, Warner Bros. Settles Lawsuit Over ‘Lord of the
While it is difficult to quantify the overall societal pervasiveness and impact of a literary work, there do seem to be objective indicators that one could use: film royalties, book royalties, merchandise royalties, and critical acclaim all seem to indicate broad societal appeal. Additionally, one could further study (and someone possibly has) the rate at which Tolkien’s books are checked out at libraries, the number of college courses that significantly address Tolkien, and other creative ways an author’s influence on society can be quantified. Given the sustained critical acclaim and popularity of Tolkien’s literature, this Article will proceed on the assumption that *The Hobbit* and *The Lord of the Rings Trilogy* are legitimate for Law and Literature purposes.

E. A Modest Proposal

As explained above, Law and Literature is a growing body of scholarship that has mixed reviews with respect to its utility. Indeed, even Law and Literature apologists find it difficult to agree on the exact direction this discipline needs to take, and such ambiguity continues to serve as fodder for its critics. However, there is broad agreement that Law and Literature is useful for purposes of jurisprudence. Thus, the purpose of this Article is as a means for anyone—legal scholars and professors, law students, and lay people—to begin to learn and understand issues in property law jurisprudence through J.R.R. Tolkien’s well-known and beloved stories.

The final reason that this Article attempts to frame Tolkien’s literature through the lens of property law is to provoke within an individual an interest in property law jurisprudence where such interest did not previously exist. The corollary to provoked interest is additional exploration, study, and eventually competence or even expertise in property law. That is, the purpose of this Article is quite modest: introduce, provoke interest, and begin to learn all connote this Author’s posture regarding what this Article can actually accomplish. Finally, lest any veteran, curmudgeon, legal scholars, and practitioners forget, this Author hastens to remind them that many successful legal professionals’ first interest in law was piqued by the likes of Atticus Finch, Perry Mason, and Jack McCoy. In the same way these fictional characters did, Tolkien’s literature, if properly framed, may have the ability to inspire an interest in the law. If law is indeed a noble profession, I say the more the merrier. Here is hoping this Article leads to more.

---

III. Property Jurisprudence in Tolkien’s Literature

A. Introduction

While it is not within the realm of a traditional literary analysis, it would not be inappropriate to suggest that property, including its nature and uses, is a dominant theme throughout Tolkien’s *The Hobbit* and *The Lord of the Rings Trilogy*.66 This analysis would certainly be acceptable in the context of Law and Literature scholarship. Though it is doubtless there are more, this Article addresses several theoretical considerations related to property law jurisprudence—that is, the “bundle of sticks”—that Tolkien covers, as well as briefly surveys several legal property issues that play a significant role throughout Tolkien’s literature. The property issues are: (1) acquisition by creation or occupancy; (2) acquisition by finding, including lost, mislaid, and abandoned property; (3) forfeiture of property obtained through criminal activity; and (4) *inter vivos* gifts.

This next section begins by examining how Tolkien addresses the theoretical foundations of property ownership, or, the “bundle of sticks.” Then, four property issues will be considered by identifying a legal issue as presented by Tolkien’s literature and the relevant common law property rule, analyzing the content from Tolkien and the common law rule, and predicting the likely legal outcome of the Tolkien scenario.

B. Tolkien and the Bundle of Sticks

In one edition of *The Lord of the Rings*, the publisher, Ballantine Books, summarized Tolkien’s story this way:

J.R.R. Tolkien’s The Lord of the Rings—of which this book is the first part—is a chronicle of the great War of the Ring . . . At that time, the One Ring . . . had been held for many years by the hobbits, but was eagerly sought by the Enemy who made it . . . Out of the struggle to possess and control the One Ring . . . there arose a war . . . The Fellowship of the Ring begins the story of . . . the flight of Frodo—unwilling heir to the One Ring—from his own land […] [and] of the great Council at which it was decided that the Ring must be destroyed . . . [Frodo and his companions must] return the Ring to Mordor . . . and . . . destroy it . . . 67

This excerpt nicely identifies several key theoretical property law issues that permeate Tolkien’s epic stories.

---

If asked to describe property law, many property law professors, as well as most law students, will begin by talking about a bundle of rights, or what is also known as “the bundle of sticks.” The bundle of sticks is a metaphor that property professors commonly use to introduce law students to the theoretical considerations that run throughout the corpus of property law. The metaphor works by comparing various property interests in real or personal property to a bundle of sticks. In that sense, it is possible for multiple parties to each have a legal interest in a piece of property just as it is possible for multiple parties to each have one stick out of the whole bundle. The fact that several people can have multiple sticks in the same piece of property is what gives rise to many legal actions regarding real and personal property. The bundle of sticks typically consists of the following interests: ownership, possession, the right to transfer, usage or control, division, exclusion, and destruction. While there is some debate regarding the legitimacy of the bundle of sticks metaphor, Professor Richard Epstein suggests, “[T]he bundle of rights normally associated with the concept of property, far from being randomly and fortuitously put together, actually coheres and forms the basis of huge portions of the terrain of the ordinary common law.” Assuming that the bundle of sticks is actually a helpful metaphor, this Article will discuss three of these rights in relation to Tolkien’s literature: (1) ownership; (2) possession; and (3) destruction of property.

1. Ownership

The concept of property ownership is of such importance that it is often expressed not simply as one of the sticks, but as the entire bundle. Frank Hall Childs defines property ownership as the “dominion over things, the right to deal with them in some particular manner to the exclusion of others, to use, to enjoy, and to dispose of them.” As part of the bundle of property rights, an individual may both own real or personal property, and yet not possess or control said property: “Ownership is distinct from possession.” Indeed, when contractual

75. Id.
and policy considerations are involved, the owner of the property may not even be able to transfer, exclude, or even destroy his own property.\textsuperscript{76} Simply put, “The right to acquire, use, and transfer property is not unlimited.”\textsuperscript{77} Still, in property law jurisprudence, ownership matters. For example, in legal actions involving found property, it is only the true owner of the personal property that has superior claim against the finder.\textsuperscript{78} Thus, the concept of property ownership is of first importance with respect to the bundle of sticks.

Just as ownership is primary regarding the bundle of sticks, it is primary in Tolkien’s literature. In \textit{The Fellowship of the Ring}, the wizard Gandalf recounted a detailed history of the One Ring (“Ring”) to Frodo Baggins, now in possession of the Ring.\textsuperscript{79} Frodo became repulsed upon learning about the wretched creature Gollum, and he lamented that his uncle, Bilbo Baggins, did not simply kill Gollum when he had the chance.\textsuperscript{80} Gandalf responded that pity and mercy were the virtues that prevented Bilbo from killing Gollum, and he concluded with this comment: “Be sure that [Bilbo] took so little hurt from the evil, and escaped in the end, because he began his ownership of the Ring so. With Pity.”\textsuperscript{81} According to Tolkien, the issue of ownership of the Ring was connected with Bilbo’s \textit{possession} of the Ring.\textsuperscript{82} Additionally, when Gandalf tells Bilbo, “I was professionally interested in your ring,” he is acknowledging that Bilbo is the current owner of the Ring.\textsuperscript{83} Gandalf made a similar statement to Frodo after Bilbo gave the Ring to Frodo: “Your ring is shown to be that One Ring by the fire-writing alone . . . .”\textsuperscript{84} These references are frequent in Tolkien, and they all relate to the property right of ownership with respect to the Ring.

2. Possession

Possession is another important concept in the bundle of property rights. Particularly with respect to lessor-lessee agreements, someone other than the true owner can possess property. Possession can be defined as, “The right to exclusive physical control of the thing owned.”\textsuperscript{85} Epstein argues that the possession stick has a powerful, yet “negative impulse” because the right to possess if left alone would only lead “up to a grand blockade [where] I could stop everybody else

from doing anything with the property that I owned, but there would be nothing else that I could do with the property myself.” 86 The concept of possession is also important when two or more individuals claim title to the same thing. 87 Therefore, while ownership is a theoretical concept of first importance in property law, possession is a close second, especially with respect to property value.

Throughout *The Hobbit* and *The Lord of the Rings Trilogy*, the issue of possession, with respect to the Ring, is ubiquitous. Tolkien scholar Colin Duriez supports this understanding when he states that “Tolkien explores power in relation to possession” and “[p]ower is a unifying theme . . . .” 88 For example, Gandalf indicated that Bilbo’s ownership of the Ring began when he first possessed the Ring. 89 In the Prologue to *The Fellowship of the Ring*, Tolkien recounts the history of the Ring, and he mentions that Gollum “possessed a secret treasure that had come to him long ages ago, when he still lived in the light: a ring of gold that made its wearer invisible.” 90 In a heated exchange between Gandalf and Bilbo, Gandalf admonishes Bilbo to let go of the Ring for the last time: “Go away and leave [the Ring] behind. Stop possessing it.” 91 Finally, there is even a more philosophical exchange regarding possession of the Ring between Gandalf and Frodo, after Gandalf had explained the true nature and origin of the Ring. Gandalf warned Frodo that “it would utterly overcome anyone of mortal race who possessed it. It would possess him.” 92 While Gandalf’s philosophical warning lacks legal resonance, it does underscore the ubiquity and importance of possessing the Ring in Tolkien’s literature.

3. Destruction of Property

A century ago Frank Hall Childs stated, “Personal property may cease to exist, or at least to have any value, by its destruction, which may result from accident, or from intention through human agency.” 93 However, today there is some debate regarding the right of owners to destroy their own property. 94 The venerable *Black’s Law Dictionary* became part of this debate when it changed its definition of *owner* from the sixth to seventh edition. 95 Specifically, the sixth edition contained the definition of *owner* as:

---

The person in whom is vested the ownership, dominion, or title of property; proprietor. He who has dominion of a thing, real or personal, corporeal or incorporeal, which he has a right to enjoy and do with as he pleases, even to spoil or destroy it, as far as the law permits, unless he be prevented by some agreement or covenant which restrains his right.  

The seventh edition, instead, chose to define owner as, “One who has the right to possess, use, and convey something; a proprietor.” Interestingly, the seventh edition omitted language indicating that the owner has the right to destroy his own property. The recently released tenth edition of Black’s Law Dictionary also omits language indicating a property owner’s right to destroy. Lior Jacob Strahilevitz asserts that as a policy matter, courts are increasingly likely to remove this stick from the property owner’s bundle: “When asked to resolve cases where one party seeks to destroy her property, courts have reacted with great hostility toward the owner’s destructive plans.” This further illustrates how it is helpful to think of property interests as a bundle of sticks or rights, and that even owners in possession of their property are not simply free to do whatever they want with their property.

The culmination of The Lord of the Rings Trilogy takes place in The Return of the King. Frodo and his traveling companion Sam Gamgee, the remnants of the original fellowship, have finally made it to Mordor, with the intention of destroying the Ring by casting it into the “Cracks of Doom in the depths of Orodruin, the Fire mountain . . . .” As the story builds to its climax, Frodo is at the Cracks of Doom, when Gollum surprises him. Gollum’s all-consuming desire for the Ring would not be denied, and in a final effort to regain control of the Ring, he bit off Frodo’s finger with the Ring still on it before falling into the Cracks of Mount Doom destroying the Ring once and for all.

Indeed, the destruction of the Ring is not simply the culmination of the story, but the very impetus. Speaking to Frodo in The Fellowship of the Ring, Gandalf states that there is only one way to break the power of the Ring and prevent it from falling into the hands of Sauron: “[F]ind the Cracks of Doom, in the depths of Orodruin, the

Fire-mountain, and cast the Ring in there, if you really wish to destroy it . . . .” Frodo’s reply left no doubt as to his intentions: “‘I really do wish to destroy it!’ cried Frodo. ‘Or, well, to have it destroyed.’” Indeed, it was Frodo’s desire to destroy the Ring that began the great quest on which the entire Lord of the Rings Trilogy is premised. While the bundle of property rights may not always include the right to destroy, the destruction of the Ring was central to Tolkien’s story, and destroying the Ring was a legitimate goal in its literary context.

C. Acquisition by Creation

Both The Hobbit and, more so, The Lord of the Rings Trilogy are centered on the One Ring (“Ring”), but these stories focus exclusively on the claims to the Ring in its present state of existence. Tolkien, however, does provide an account of the origin of the Ring. In The Fellowship of the Ring, Frodo, upon learning about the power of the Ring, expressed his trepidation to Gandalf: “‘This ring!’ He stammered. ‘How, how on earth did it come to me?’” This prompted Gandalf to provide a brief history of the Ring, beginning with “Sauron the Great, the Dark Lord.” In explaining Sauron’s plan to consolidate power by obtaining the Ring, Gandalf stated, “He only needs the One; for he made that ring himself, it is his, and let a great part of his own power pass into it . . . .” Later in the conversation, Frodo was increasingly distressed by the Ring’s power and checkered history, and he expressed a desire to simply destroy the Ring. This prompted a degree of amusement from Gandalf followed by an explanation and demonstration of how it was nearly impossible to destroy the Ring. Gandalf concluded by stating, “[N]or was there ever any dragon, not even Ancalagon the Black, who could have harmed the One Ring, the Ruling Ring, for that was made by Sauron himself.”

Appendix B in The Return of the King also identifies c. 1600 of the Second Age as the date when “Sauron forge[d] the One Ring in Orodruin.” Tolkien clearly identifies Sauron as the creator of the Ring in these passages. Moreover, Gandalf’s admission that “it is his” indicates Sauron is indeed the Ring’s rightful owner.

A legal issue here is whether any subsequent possessors of the Ring could prevail in an action against Sauron. The notion that one can acquire property through creation or occupancy is “the first general

mode of acquiring title to personal property.”115 As Horace E. Smith states, acquisition by occupancy “is primal,” and “[o]ccupancy is generally regarded as the first known method of acquiring exclusive title to property.116 D.F. Libling argues that this principle is deeply embedded in the common law:

Any expenditure of mental or physical effort, as a result of which there is created an entity, whether tangible or intangible, vests in the person who brought the entity into being, a proprietary right to the commercial exploitation of that entity, which right is separate and independent from the ownership of that entity.117

From this understanding, some legal scholars extrapolated that Libling’s theory of a creator’s right trades on John Locke’s understanding that “you own the fruits of your labor in consequence of having ‘a property in your own person.’”118 While this Article focuses on the common law rules that govern property, Locke’s Labor Theory of Property is often considered a principle of natural law.119 Pace some contemporary legal scholars, it was classically understood that common law is derived from natural law.120 Harkening back to a “State of Nature,” Locke reasoned that one ought to possess the fruits of one’s own labor because it is an individual’s work created the thing possessed, thus connecting labor and ownership.121 Although Locke’s Labor Theory is often discussed today in the context of intellectual property, his understanding of property acquired through creation undergirds the entire corpus of personal property at common law. While “the fruits of your labor are not always yours alone to exploit, and you do not always have full rights of property in your own person,” it is a settled rule of common law that one generally owns the fruits of one’s labor.122

Here, the facts from Tolkien clearly indicate that Sauron the Great, or the Dark Lord, is the creator of the Ring. Gandalf readily admits

so multiple times. While neither *The Hobbit* nor *The Lord of the Rings Trilogy* takes place during the period in which Sauron created and possessed the Ring, there is no dispute that Sauron created the Ring, and as such, is the Ring’s true owner. Applying common law principles, Sauron would prevail in an action against any of the subsequent possessors of the Ring, unless some intervening event had taken place such as abandonment or assignment of the Ring. In any action between any of the subsequent possessors (Isildur, Déagol, Gollum, Bilbo, or Frodo), none could claim a right to possession under a theory of occupancy. Instead, the dispute would involve subsequent possessors of property.

D. *Acquisition by Finding*

After Bilbo Baggins gifted Frodo the Ring, Gandalf explained to Frodo the significance of the Ring. This explanation caused Frodo to become distressed regarding the great power behind the Ring, and the evil of those who sought to possess the Ring. Frodo could finally take no more as he exclaimed, “I wish [Bilbo] had not kept the Ring. I wish he had never found it . . . .” Here, Frodo is referring to *The Hobbit* when Bilbo first came upon the Ring after he fell into orc mines in the depths of the Misty Mountains. Gandalf also claimed, “Behind that, there was something else at work, behind any design of the Ring-Maker. I can put it no plainer than by saying that Bilbo was meant to find the Ring, and not by its maker.” Here, Gandalf acknowledged the existence of a “Ring-Maker,” Sauron, and yet he claimed that Bilbo was meant to find and possess the Ring.

To further solidify that the Ring was indeed found, in the Prologue to *The Fellowship of the Ring*, Tolkien actually titled the section describing how Bilbo came upon the Ring as, “Of the Finding of the Ring.” Here, a legal issue to explore is whether Gollum would prevail in an action against Bilbo. To do so, it must be determined where and how Frodo found the Ring, and whether the Ring was lost, mislaid, or abandoned by Gollum when Bilbo found it.

131. For a look at Tolkien’s use of providence, see *Duriez* *supra* note 57, at 208–12.
One of the classic cases regarding lost personal property is *Armory v. Delamirie*.\(^{133}\) In *Armory*, a son of a chimney sweeper found a rare jewel while cleaning the home of a customer.\(^{134}\) After the boy took the jewel to a local goldsmith to be appraised, the goldsmith’s apprentice attempted to keep the jewel after learning about how valuable it was.\(^{135}\) In its holding, the *Armory* court articulated a common law rule that the title of the finder is good as against the whole world but the true owner.\(^{136}\) However, if the dispute is between the landowner and the finder, “the landowner will win if the finder was trespassing at the time she found the object.”\(^{137}\) Thus, title of the finder is good against the whole world but the true owner, provided the finder was not trespassing when she found the object.

Another significant case that addressed personal property found on the real property of another is *Hannah v. Peel*.\(^{138}\) In *Hannah*, a soldier in World War II found a brooch while staying at another’s home during the war.\(^{139}\) The homeowner was not living there at the time.\(^{140}\) The *Hannah* court, which entered a judgment for the soldier, articulated the following rules: “A man possesses everything which is attached to or under his land. Secondly . . . a man does not necessarily possess a thing which is lying unattached on the surface of his land even though the thing is not possessed by someone else.”\(^{141}\)

Here, Bilbo found his Ring during an accidental fall into the depths of the Misty Mountains. As it happened, Bilbo ended up encountering Gollum near his home. In a conversation with Gandalf, Bilbo states, “[The Ring] is my own. I found it. It came to me . . . It is mine, I tell you. My own.”\(^{142}\) Tolkien’s account provided that Bilbo found the Ring in an area outside of Gollum’s property.\(^{143}\) Since Bilbo did not find the Ring while on Gollum’s property, the rule from *Hannah* does not apply. Therefore, the *Armory* rule controls, and Bilbo would have a right to the Ring against everyone but the Ring’s true owner. The legal issue now becomes whether the Ring was *lost, mislaid*, or

abandoned by Gollum when Bilbo found it, and whether Gollum was indeed the Ring’s true owner.

1. Lost, Mislaid, and Abandoned Property

Of all of the property law issues, lost, mislaid, and abandoned personal property may be the most significant throughout the narrative. For example, in The Hobbit, the Ring was discovered by Bilbo in the Misty Mountains, and there would be a genuine factual dispute as to whether Gollum lost or mislaid the Ring. After Bilbo and the thirteen dwarves reached the Misty Mountains, Bilbo was separated from the group, and he ended up tumbling into the black orc mines, deep in the Misty Mountains. As Bilbo lay there after his fall “he groped in vain in the dark, he put his hand on the ring, lying on the floor of a tunnel. He put it in his pocket.” Tolkien tells us that, “Trying to find his way out, Bilbo went on down to the roots of the mountains, until he could go no further. At the bottom of the tunnel lay a cold lake far from the light, and on an island of rock in the water lived Gollum.” Tolkien, who interestingly never goes as far as to grant title to Gollum, instead states, “[Gollum] possessed a secret treasure that had come to him long ages ago . . . a ring of gold that made its wearer invisible.” After Gollum’s encounter with Bilbo ended poorly for Gollum, “He slipped away, and returned to his island . . . far off in the dark water. There, he thought, lay his ring.” Tolkien concludes, “But the ring was not on the island; he had lost it . . . .” As the theme of Providence runs throughout Tolkien’s work, it is also interesting that Gandalf tells Frodo, “[The Ring] abandoned Gollum.”

At common law, courts divide personal property into lost, mislaid, and abandoned property:

Property is lost when the owner accidentally misplaced it; it is mislaid when the owner intentionally left it somewhere—and then forgets where she put it; it is abandoned when the owner forms an intent to relinquish all rights in the property. Property that has been lost or mislaid may subsequently be abandoned if the owner intends to give up any claim to the property.

Horace E. Smith asserts that “[a]t common law, to goods lost by the owner and unreclaimed, or designedly abandoned by him, the finder

152. TOLKIEN, supra note 67, at 88.
153. SINGER, supra note 137, at 95.
acquires title by occupancy.” However, the former owner must have “completely relinquished the chattel before a perfect title will accrue to the finder.”

Michael v. First Chicago Corp. articulated the common law rule that “[a] finder of property acquires no rights in mislaid property, is entitled to possession of lost property against everyone except the true owner, and is entitled to keep abandoned property.” While this general rule is correct as far as it goes, it does not go far enough, so different jurisdictions consider additional factors, such as if the property was found in a public or private place.

Courts distinguish between when an object is considered lost or abandoned and un-reclaimed, and when it is considered mislaid. Lost property:

[M]ay be defined as that which the owner has involuntarily parted with through neglect, carelessness, or inadvertence. There is a presumption of abandonment obtaining until the owner appears and claims the property, that gives the right as legal possessor to the finder, the presumption being disputable by the rightful owner.

Property is considered mislaid when “the owner intentionally places where he can again resort to it, and then forgets.” When mislaid property is found on the land of another, it “is presumed to be left in the custody of the owner or occupier of the premises upon which it is found, and it is generally held that the right of possession to mislaid property as against all except the true owner is in the owner or occupant of such premises.” In order for a property to be considered abandoned, courts have determined two elements must be present: “[T]he law demands proof both of an owner's intent to abandon the property and of some affirmative act or omission demonstrating that intention.” The owner’s intent to abandon and the subsequent affirmative act or omission require fact-dependent analyses.

Here, Tolkien is clear that Gollum “had lost [the Ring].” Tolkien states that Gollum “kept [the Ring] hidden safe in a hole on his island, except when he was hunting or spying on the orcs of the mines.” Bilbo found the Ring in the orc mines, above Gollum’s island where he kept the Ring hidden. Additionally, it is part of the record that

163. Id.
164. Id. at 32.
Gollum would go out spying on the orcs, and this was the only time he would take the Ring off his island home.\footnote{165}{Id. at 33.} Therefore, it is not likely that the Ring was intentionally placed in the tunnel where Bilbo found it, and there is no evidence that Gollum had simply forgotten where he last set down the Ring. Instead, it is likely that the Ring was simply dropped by Gollum during one of his orc-watching excursions. Indeed, Frodo specifically asked Gandalf, “[W]hy didn’t [Gollum] get rid of [the Ring], or go away and leave it?”\footnote{166}{Id. at 87.} Gandalf responded, “A Ring of Power looks after itself. It may slip off treacherously, but its keeper never abandons it.”\footnote{167}{TOLKIEN, supra note 67, at 87 (emphasis added).} Gollum certainly thought he lost the Ring, or as he called it, “Precious”: “‘Where is it? Where iss it?’ Bilbo heard [Gollum] crying. ‘Losst it is, my precious, lost, lost! Curse us and crush us, my precious is lost!’”\footnote{168}{TOLKIEN, supra note 129, at 82.} Thus, while it could be argued that the Ring was mislaid, it is more likely that Gollum lost the Ring.

After falling into the Misty Mountains, Bilbo discovered the Ring in a tunnel, above the “island of rock in the water” where Gollum lived.\footnote{169}{TOLKIEN, supra note 67, at 32.} That is to say, the Ring was not discovered on the property of Gollum. If Bilbo had discovered the Ring on the property of Gollum, then it would need to be determined if he was a trespasser, and \textit{Hannah} would apply. However, because the Ring would likely be considered lost personal property, found by Bilbo, and not on the property of Gollum, the rule from \textit{Armory} controls; Bilbo would prevail against everyone except the true owner of the Ring. Therefore, Gollum’s own means of obtaining possession of the Ring need to be scrutinized to determine if he is in fact the Ring’s true owner. If Gollum is the true owner, he would prevail in an action against Bilbo to reclaim his lost Ring. However, if Gollum is not the Ring’s true owner, Bilbo would prevail.

\textbf{E. Property Obtained through Criminal Activity}

Tolkien’s literature has been lauded in large part due to the depth of history and detail he created regarding Middle Earth. This included chronologies, genealogies, and even an Elvish language.\footnote{170}{See TOLKIEN, supra note 101, at Apps. A-F.} Tolkien even included some details of the legal customs of hobbits: “[Bilbo’s will] was, unfortunately, very clear and correct (according to the legal customs of hobbits, which demanded among other things seven signatures of witnesses in red ink).”\footnote{171}{TOLKIEN, supra note 67, at 66.} While Tolkien did discuss some hobbit political mores with respect to municipalities and
governmental structure. Tolkien never provided a fully developed legal system. However, this Article assumes that Middle Earth was a common law jurisdiction, and that includes criminal activity. Therefore, the next legal issue is to determine whether Gollum obtained the Ring through criminal activity, and how that would affect any legal action brought by Gollum seeking the courts to help him regain the lost Ring.

The story regarding how Gollum came upon the Ring was passed down from Gandalf to Frodo in *The Fellowship of the Ring*. One day Gollum was out on a river at Gladden Fields with his friend, Déagol, when they parted company. Gollum went to look around the riverbanks, while Déagol took the boat out to fish. Déagol hooked a fish so large that he was pulled into the water. As Déagol was dragged to the bottom of the river, he spotted and grabbed a shiny object in the riverbed. The shiny object was the One Ring. Sméagol witnessed Déagol’s discovery, and he immediately suggested to Déagol that the Ring would be a fine birthday present for Sméagol. When Déagol demurred, Sméagol “caught Déagol by the throat and strangled him, because the gold looked so bright and beautiful.” Gandalf confirmed the criminal nature of Sméagol’s action by stating, “No one ever found out what had become of Déagol; he was murdered far from home, and his body was cunningly hidden.” He later reiterated, “The murder of Déagol haunted Gollum.” According to Appendix B: “The Tale of Years” in *The Return of the King*, the year of 2463 in the Third Age, is described as, “About [the] time Déagol the Stoor finds the One Ring, and is murdered by Sméagol.” Tolkien’s record is clear that Gollum obtained the Ring by committing the criminal act of murder.

Murder is the killing of another human being with malice aforethought. Malice aforethought is “a fixed purpose or design to do some physical harm to another that exists before the act is committed, and it may be shown by proof that the defendant, without justification or excuse, intended to kill the victim, or to do the victim grievous bodily harm.” Malice is considered present “when an unlawful homicide has been committed with the intention unlawfully to take

183. 40 AM. JUR. 2D Homicide § 36 (2014).
184. Id.
away the life of a fellow human being, or with awareness of the danger and a conscious disregard for life.”\textsuperscript{185} The distinction between first and second degree murder is that while second degree murder only requires malice aforethought, first degree murder requires evidence of premeditation.\textsuperscript{186}

As previously discussed, the common law is derived from principles of natural law.\textsuperscript{187} According to Riggs \textit{v. Palmer}, it is considered a maxim of natural law that, “No one shall be permitted to profit by his own fraud, or to take advantage of his own wrong, or to found any claim upon his own iniquity, or to acquire property by his own crime.”\textsuperscript{188} In Riggs, a grandson, Palmer, killed his grandfather after he discovered that his grandfather was going to disinherit him.\textsuperscript{189} Although the plain language of New York’s controlling Statute of Wills would still have allowed Palmer to take under his grandfather’s will, the Riggs court held that, “[One] shall not acquire property by his crime, and thus be rewarded for its commission.”\textsuperscript{190} While this case has been criticized for its problematic method of statutory interpretation, the common law maxim supporting the decision remains valid.

Another relevant legal doctrine is that “before a complainant can have a standing in court he must first show that not only has he a good and meritorious cause of action, but he must come into court with clean hands.”\textsuperscript{191} Also known as the \textit{Clean Hands Doctrine}, this principle dictates that “the equitable powers of . . . court can never be exerted in behalf of one who has acted fraudulently, or who by deceit or any unfair means has gained an advantage.”\textsuperscript{192} However, this doctrine is limited in that it does not “close [the] doors because of plaintiff’s misconduct, whatever its character, that has no relation to anything involved in the suit.”\textsuperscript{193} Instead, one who seeks equity from courts must have clean hands in “immediate and necessary relation to the equity that he seeks in respect of the matter in litigation.”\textsuperscript{194} Thus, the \textit{Clean Hands Doctrine} is designed to prevent courts from becoming “abetter[s] of iniquity,” with respect to the specific issue before the court.\textsuperscript{195}

The \textit{Clean Hands Doctrine} would likely bar Gollum from bringing an action seeking a court to grant relief by returning the Ring to him. Gollum first obtained the Ring through the unlawful, indeed criminal,
act of murder. Therefore, Gollum could not then use the courts to retrieve the Ring from Frodo. Even if Gollum did make it to court, he would not be found to have title to the Ring because it would offend the common law principle that one should not obtain property from his crime and thereby benefit from its commission. Here, Gollum obtained the Ring by strangling Déagol. Gandalf’s account alleged that Gollum “caught Déagol by the throat and strangled him, because the gold looked so bright and beautiful.”

This was likely done with malice aforethought as Gollum clearly wanted to do Déagol harm and take his ring. However, there does not appear to be premeditation, so Gollum’s offense would be second degree murder. Under the rule in Riggs, Gollum would have to forfeit the Ring. Just as Palmer was prevented from taking under his grandfather’s will in Riggs, Gollum should be prevented from murdering Déagol, and then profiting by gaining title to the Ring. Indeed, if Gollum were allowed to keep the Ring, he would be directly “acquiring property by his own crime.”

Therefore, it is likely that Gollum is not the Ring’s true owner because he obtained the Ring through a criminal act.

F. Inter Vivos Gifts

The opening of The Fellowship of the Ring begins at the Shire with birthday party preparations by and for the eccentric hobbit, Bilbo Baggins. Following the party, Bilbo left the Shire for good, but not before he conveyed his house and much of his property to his nephew and heir, Frodo. Most importantly, Bilbo transferred the Ring to Frodo. Tolkien includes the fact that such a gift was executed within the legal custom of hobbits: “[Bilbo’s will] was, unfortunately, very clear and correct (according to the legal customs of hobbits, which demand among other things seven signatures of witnesses in red ink).”

It is also noteworthy that while Frodo is indeed Bilbo’s nephew, Bilbo had also adopted Frodo as his heir, again within the legal custom of hobbits. The legal issues regarding Bilbo’s transfer of the Ring to Frodo are to determine whether this was an inter vivos or causa mortis gift, and whether it is a valid transfer so that Frodo had legal ownership of the Ring following the transaction.

Childs defines a gift “in its broadest sense, [as] a transfer of property, services, or rights without consideration.” The common law separates lifetime gifts into causa mortis gifts and inter vivos gifts.
Specifically, “A gift *inter vivos* is a voluntary, actual, and immediate transfer of a thing by one living person to, or for, another living person.”

204. A *causa mortis* gift is one “made in contemplation of and in expectation of immediate approaching death . . . .”

205. Courts have typically been more rigid in their application of *causa mortis* gifts than *inter vivos* gifts due to policy reasons associated with wills formalities, and because a *causa mortis* gift is essentially a will substitute. However, the modern trend of relaxing wills act formalities has loosened the application of *causa mortis* standards.

206. Here, the record indicates that Bilbo’s gift followed hobbit legal custom. While Bilbo was advanced in age (he had just celebrated his “eleventy-first” birthday), his conveyance of the Ring to Frodo does not appear to be in contemplation of immediate approaching death. Indeed, Bilbo indicated to Gandalf that, upon leaving the Shire, he planned to execute his plan of taking a holiday, which included traveling to see mountains and writing his book. This is hardly the plan of a one who believes his death is “immediate and approaching.” Therefore, this is likely to be considered an *inter vivos* gift, and not a *causa mortis* gift.

207. *Gruen v. Gruen* was a classic case that articulated the common law rules of *inter vivos* gifts. In *Gruen*, a son brought a claim against his stepmother to recover a painting that she possessed. The son alleged his late father gave him title to the painting, but the father retained possession until his death in 1980. The stepmother contended that the gift was testamentary and invalid because it failed to comply with will formalities. In its decision, the *Gruen* court articulated the following rules regarding *inter vivos* gifts: “First, to make a valid *inter vivos* gift there must exist the intent on the part of the donor to make a present transfer; delivery of the gift, either actual or constructive to the donee; and acceptance by the donee.” That is, for a valid *inter vivos* gift, there must be: (1) Donative intent; (2) Delivery; and (3) Acceptance. The legal question then becomes whether or not evidence in the record supports that this gift met all three elements for a valid *inter vivos* gift.

208. It is likely that Bilbo possessed the requisite donative intent to make this a valid *inter vivos* gift. With respect to donative intent,
courts have held that “the intention of the grantor . . . may be manifested by mere acts and words or both combined.”

Here, Gandalf asked Bilbo, before leaving for a long holiday, whether he planned to leave the Ring to Frodo. Bilbo responded, “Well, er, yes, I suppose so . . .” As Bilbo was about to leave, he discovered that the Ring was actually still in his pocket. This prompted him to say himself, “Yes after all, why not? Why shouldn’t it stay there?” Despite Gandalf’s best efforts to persuade him, Bilbo seemed to conclude that the Ring would stay with him permanently: “I shall keep it, I say.” This touched off a heated exchange between Bilbo and Gandalf with neither backing down. However, Bilbo finally relented, as Gandalf admonished him to, “Stop possessing it. Give it to Frodo, and I will look after him.” Bilbo responded, “Very well . . . [The Ring] goes to Frodo with all the rest.” Although Bilbo required some convincing from Gandalf, in the end he manifested both the requisite words and actions to demonstrate donative intent.

It is also likely that Bilbo’s delivery of the Ring was sufficient to satisfy the second element of the inter vivos gift analysis. For inter vivos gifts, “The delivery must be as perfect as the nature of the property, and circumstances and surroundings of the parties will reasonably permit, and hence it may take one of the three forms recited.” Here, Bilbo asked Gandalf to deliver the Ring to Frodo: “You had better take [the Ring] and deliver it for me. That would be the safest.” But Gandalf refused, and instead advised Bilbo to “[p]ut it on the mantelpiece. It will be safe enough there, till Frodo comes.” When Frodo arrived at the house, Gandalf told him that Bilbo left a packet for him: “Frodo took the envelope from the mantelpiece, and glanced at it, but did not open it.” After Gandalf told Frodo about the envelope’s contents, Frodo exclaimed, “The Ring! . . . Has he left me that?” Bilbo’s delivery of the Ring—leaving it on the mantle, and having Gandalf tell Frodo about it—represents a constructive delivery of the Ring. Therefore, it is likely that Bilbo’s gift met the delivery element of a valid inter vivos gift.

Finally, it is likely that Frodo accepted Bilbo’s gift of the Ring. Acceptance “may be actual or implied and may also be evidenced by words and conduct, need not be contemporaneous with delivery, but

may be manifested subsequently." 226 Here, Frodo stated, "The Ring! Has [Bilbo] left me that? I wonder why. Still, it may be useful." 227 As previously discussed, Gandalf would soon cause Frodo to question whether he wanted to keep the Ring. 228 However, at this time, it seems Frodo had accepted the Ring (albeit more casually than he probably should have). Therefore, Frodo’s action of acknowledging and accepting the Ring from Bilbo would likely meet the third element for a valid inter vivos gift, granting Frodo title to the Ring.

IV. CONCLUSION

J.R.R. Tolkien’s The Hobbit and The Lord of the Rings Trilogy are not simply popular and captivating fantasy epics, they can also be a helpful tool for exploring issues in property law jurisprudence. To reprise Tolkien, there is indeed an “applicability of fantasy.” 229 Moreover, legal scholars can remain agnostic as to the legitimacy of Law and Literature, and still recognize Tolkien’s works may provoke within a colleague, practicing attorney, law student, or lay person an increased interest in law generally, and an issue within property law more specifically. Thus, the approach taken in this Article is best thought of as a first step in property law rather than a final destination (the same goes for Tolkien’s literature). If law is, as is often suggested by its practitioners, a noble profession, those within its ranks must have the confidence to both recognize and celebrate its manifestations throughout society—even when they are found in unlikely places, or perhaps even on an unlikely journey.
